Introduction :

CTE-PRO is fully automatic concrete compression testing machine. Concrete test sample block will place between fixed and swevelling platens and start the cycle. Force will apply on test sample gradually and it will brake.

Once test sample brakes its compressive strength will display on screen.

Construction :

- Heavy duty spherical seat, allowing initial free alignment at the initial contact with the specimen and automatic jamming up to the end of test.
- Surface hardness of platen is 55 HRC, flatness tolerance 0.03mm. Traceable certificate of surface hardness available on request.
- Piston travel limit switch (extra cost).
- Safety door mode of GI sheet with acrylic window.

Due to constant Research & Development, Specifications and Features are subject to change without notice.
